

Steve Lipke / 'World on Fire'

"World on fire / see the tide
rising higher / winds of change
gonna blow it all away..."

Global warming
climate change
whatever it's called
it's happening.

Some times I look at little children
and wonder
what their world will be like decades from now
when they're at, where I am, now
in my lifespan.

So, as a songwriter I felt compelled to write this song
"World on Fire"...and as it went along
other songs I've written, came around it
as part of the weave
of this recent EP
"World on Fire."

*Steve Lipke is a singer/songwriter in Northern California.
His latest release is the EP 'World on Fire'.*
